Projects

Clinic Management System

• Dental Clinic Management System

Developed a full-stack desktop application for dental clinic management using React.js, Electron, and SQLite, enabling fully offline operation with no cloud dependency or recurring costs. Designed a relational database schema connecting patients, visits, and appointments through foreign keys, with a secure IPC bridge handling all communication between the React frontend and Electron backend. Implemented appointment scheduling, automated billing with PDF invoice generation, real-time dashboard analytics, and a full backup/restore system for data portability.

encoderbytes.com

• EncoderBytes – Official Company Website

As a Frontend Developer Redesigned and customized the frontend to improve user experience and visual consistency Implemented responsive layouts ensuring seamless performance on mobile and desktop Collaborated with team members to refine UI components and fix frontend issues

childbook-ai-pink.vercel.app

• Child Book Ai

Developed an AI-powered web application that generates children's stories based on user prompts. Built with React.js, Tailwind CSS, Node.js, and Express.js, with API integration for AI story generation. Provides an interactive and user-friendly interface where users can create and read customized storybooks.

planto-project-9814.vercel.app

• Planto E-Commerce Website

Designed and developed an e-commerce application for plants using React.js and Tailwind CSS. Integrated APIs for plant data, implemented Add to Cart and order placement functionality, and delivered a smooth, responsive shopping experience.

planto-dashboard.vercel.app

• Planto Dashboard

Designed and developed an admin dashboard for a plant e-commerce website using React.js and Tailwind CSS. Implemented API integrations to manage plant inventory, orders, and user data, including real-time cart tracking and order management features. Delivered a fast, responsive, and user-friendly dashboard experience.
